BSI Sport Kft.'s privacy policy

Introduction

BSI Sport Kft. informs the participants of its races and the people creating an account on its registration system about its data processing practices and the legal remedies of users. BSI Sport Kft. as data controller complying with the requirements laid down in Act CXII of 2011 on the Right of Informational Self-Determination and on Freedom of Information (hereinafter: Privacy Act) commits itself to provide data processing services which are in line with the legal requirements mentioned above and other requirements laid down in the legislation in force.

Data of data controller:

Name: BSI Sport Kft.

Registered office: 1138 Budapest, Váci út 152-156.

Postal address: 1554 Budapest, Pf. 7.

Company registration number: 01-09-729245

Tax number: 13320360-2-41

Email address: nevezes@futanet.hu, info@futanet.hu

Telephone: (1) 220-8211, (20) 965-1966

Fax: (1) 273-0936

Website: www.futanet.hu, nevezes.futanet.hu

Data controller registration number: 01389-0001

Legal basis of data processing

According to Section 5 (1) of the Privacy Act, the legal basis for processing personal data is the consent of the data subject. When you register for our events, subscribe to newsletters, training programmes, 'Spuri' running magazine or you create an account through our online registration system, you give your consent that the data detailed below may be processed.

Apart from asking for your consent to data processing in general, we ask you to give your special consent to receive emails and text messages for marketing purposes. This consent can be withdrawn any time, regardless of other data. We have no grounds to refuse your participation in the events due to the withdrawal of such data.

Registering another competitor

Our experience shows that our customers require the opportunity to register their friends, family members or colleagues for our events. This simplified registration makes the life of runners and BSI Sport Kft easier as well. When registering a team, the team leader has to register the team members

as well, as team members can only register together and we cannot expect the physical presence of all the members of the team.

Thus BSI Sport Kft. provides the opportunity for its customers to register others for its events as well. In this case we assume and expect that our customer who is registering the others would have the consent of the people concerned about processing their data in connection with registration. It is usually not required to have a written consent to process personal data, consequently we do not want to overburden our customers with bureaucratic procedures, either.

Purposes and duration of data processing

General purposes of data processing of BSI Sport Kft.

- to identify and keep records of our customers and record registrations
- to organize our events
- to inform our customers and do our promotional activities
- to carry out financial accounting
- to compile statistics and analyses
- to identify those people who are entitled to special registration offers and match these special offers and customers
- to contact a family member given by the customer in case of medical problems in our events
- to improve the quality of our services and prepare new events

Customers in our database can register for our events any time in the future, so we should be able to identify them for an unlimited period of time. We might also need to be able to get access to the data for an unlimited period of time to provide special registration offers (eg. the person has already entered an event organized by BSI), to keep records of race series (eg. Club of Jubilee Runners) and for promotional purposes (to find those people who have entered a race the most times) Taking into the account the purpose limitation principle, we will store personal data of our customers in our database until the withdrawal of consent of our customers, that is to say we will only delete them on special request.

Details about our marketing activities

Within the framework of marketing activities, BSI Sport Kft.

- carries out statistical analyses in order to improve its services and identify the offers that might appeal to its customers
- forms target groups from its customers, who might be interested in certain services or offers, or who it should target with its offers
- sends newsletters and advertisements via emails
- sends advertisements via text messages (we hardly ever use it, sending emails is our most important tool of direct marketing
- can use the photographs and videos made about the participants of its events (each time you register for an event, you have to give your special consent to it, and you cannot register for an event without it, as we might not be able to identify the people in the pictures in all cases.

Data transfer to other countries

BSI Sport Kft does not transfer any personal data to other countries.

Scope of data processed

The scope of the data we process and the purposes of data processing will be specified below. It is important to highlight that BSI Sport Kft. does not keep records of any special data about its customers. We only keep records of data given by our customers, and of values calculated from them (membership of the Club of Jubilee Runners, eligibility for the Spuri Golden Card) We also keep records of race results (eg. net time, place, distance covered) and other data in connection with organizing races (race bib pick-up, confirmation of registration).

We keep records of data of financial transactions (date, amount of money, currency, amount of money paid, transaction ID in case of online registration). In our online registration system paying by payment cards is through the safe, 3-partner online payment system of OTP, where our customers give the data directly to the bank, so BSI Sport Kft is not in possession of any data about payment cards, and we do not process such data.

There is a special group of our customers, who have subscribed to our newsletters or online training plans, but they have not created an account on our registration system and they do not register for events. We only store their names and email addresses which they provided when creating an account.

Our Data Processing Partners

At most of or races we use chip timing systems. Our race-timing partners are given the personal data and entry details of the participants of the given race in order for them to run the competition. After that this data, along with the measured times during the race and the list of the results, is given back to us and the lists of the results are being uploaded to our website as well. Our race-timing partners process the data only for the purposes and in the manner specified by BSI Sport Kft.

On our website, we specify the exact race-timing partner in the description of each race. Our most frequent partners are:

- AGNI-TECH Informatikai Kereskedelmi és Szolgáltató Kft. (www.agni-timing.hu, sportido@agni.hu, (1) 236-3011)
- Evochip Hungary Sportszolgáltató Kft. (3232, Gyöngyös-Mátrafüred, Hegyalja u. 24/a, http://www.evochip.hu/, info@evochip.hu, (20) 335-2880)
- We might have different partners at certain races.

At some of our events, we provide medal engraving with the help of an external partner who take the race results from a publicly available results list. The data (name, mailing address, race result) of those people who order a subsequently mailed medal insert is given to our partner. The engraving is done by Imre Csikár individual entrepreneur – his contact information can be found at the http://serlegdiszkont.hu/ website.

Teachers who are part of the school entry program get their orders through mail by Benyó Kft. (2040 Budaörs, Ady Endre u. 51., (23) 422-610).

After our races, we provide Futófotó (https://www.futofoto.hu/) with the name, bib and net time of the participants, as well as the team's name, in order for the participants to make the pictures – taken during the race – searchable, and to be able to create downloadable certificates for the athletes.

Apart from the partners mentioned above, we do not disclose any personal information of our customers to other companies.

The data of our customers who sign up for the race through their company is collected and forwarded to us by their firm. The data management is done by BSI in this case as well.

Race info

At some of our races the http://bsi.raceinfo.hu website is operated by AGNI-TECH, where participants can be followed during the race based on their bib, and results can also be seen up until the next event. This is part of our services that helps friends and family members of the participants to get informed. Upon registration to the races, our customers give their consent to appear in the service.

Start lists and lists of results

In most of our events we publish a start list and a list of results about the participants to enhance the purity and transparency of sports events just as it is done in other races in the world. The start list includes the following data about the competitor: name, date of birth, residence (only the name of the municipality), citizenship, gender, sports club, and age group in the given event. On this basis, everyone will see who they will compete with. The list of results might also include – apart from the data of the start list – chip and gun times, split times, distances covered, place (overall and category), as well as whether the participant was disqualified, did not finish or was given a time penalty.

By registering for the events, our customers give their consent to the publication of their data in the start lists and the lists of results.

Neither start lists, nor lists of results are made in our fitness events.

Sending emails and text messages

We send an email to all of our customers

- when they have created an account on the online registration system successfully
- when they have registered for an event successfully (confirmation letter) – except when they have registered in person
- when they have asked to have their password modified
- to send them information about our events
- after timed events (a letter informing you about the results)
- for the purpose of administration and data validation

We send a text message

- when you have won the Spuri Golden Card (virtual golden card)
- to inform you about your time after you have passed the finish line in some of our events
- in case of exceptional occurrences, if competitors cannot be informed about them in any other way (eg. an event has to be cancelled because of a heavy storm at the last minute)

The messages mentioned above form part of our services, we send them regardless of your consent to receiving letters for promotional purposes.

We only send you emails and text messages for promotional purposes if you have given your consent to receiving them. This consent can be withdrawn any time, for example you can unsubscribe by clicking on the button at the bottom of our newsletters, or in a separate email.

People who are authorized to have access to data

Personal data given by our customers can be accessed only by those employees who do tasks in connection with registration, as well as those ones who analyze, aggregate, assess data and those people who are responsible for informing our customers before and after the events. The people mentioned above include the following:

- people who register entrants and record data
- system operator, operator of our database
- financial workers
- people who do the marketing

Requesting data through online forms

In some cases, we request data from our customers through our https://urlapkezelo.hu/ website. The data provided here is e-mailed to the appropriate members of our staff.

The location of our servers involved in data management

The location of the data management done by BSI Sport Kft. is the office of BSI (1138 Bp. Váci út 152-156.).

Some of our websites and our database is provided by a server placed at T-Systems Budapest II. Adatpark (1087 Budapest, Asztalos Sándor u. 13.).

Our other websites are operated by Dotroll Kft. (1148 Budapest, Fogarasi út 3-5.). Their contact information: https://dotroll.com/hu/kapcsolat.

We use virtual servers in Amazon Cloud. Any of the services listed above might be migrated for load balancing. Amazon's GDPR Declaration of Conformity can be found here: https://aws.amazon.com/compliance/gdpr-center/.

Data generated when visiting websites

Just as all other web servers on the internet, our web servers atutomatically store certain data when our websites are visited, which can be considered personal data. When visiting www.futanet.hu, nevezes.futanet.hu, runinbudapest.com, entry.budapestmarathon.com and others of our websites, servers usually store the normal data to repair breakdowns, improve services and find out about break-in attempts

- date of visit
- URL address of the webpage visited
- referring site (where the visitor arrived from)
- IP address of the visitor
- The user agent of the visitor, which includes the type and version of your operating system and your browser.

Data stored on participants/customers

The data listed below is used to identify the participants (e.g. to distinguish the participants with similar names), to contact them, to provide the service (e. g. to send out notifications regarding the races), to run the races (e.g. to assign bibs and starting zones, create different categories, establish the results by category, check entries, resolve problems), for financial summaries, and for the marketing services detailed above. The data that is not essential for registration and sign up is marked as optional.

T-shirt sizes are needed partly to be able to order the right quantity of each size of the T-shirts for the given race, and partly to have this information for future events when we provide complimentary T-shirts – this way we can have an estimate on the amount of T-shirts needed for each size. Therefore, if we ask for the T-shirt size upon registration it does not automatically mean that a complimentary T-shirt is provided at the given race – only if the registration fee section in the information of the event specifically says so.

Basic data:

- ID in the database (runner ID), which is the same as the Spuri Golden Card's number (previously called loyalty runner registration number – generated automatically),
- full name, title,
- date of birth,
- permanent address / mailing address,
- nationality,
- phone number,
- e-mail address,
- level of education (not mandatory, used for statistical and marketing purposes),
- occupation (not mandatory, used for statistical and marketing purposes),
- brand of running shoes and sports watch (not mandatory, used for statistical and marketing purposes),
- sports club (if applicable, not mandatory – it appears in the start list and results list, according to international practice),
- chip number of the runner's own chip (if applicable, not mandatory),
- whether the runner agrees to receive other information and e-mails regarding future events and opportunities,
- data about the subscription to Spuri Running Magazine (issues, subscription fee, payment method and payment date),
- last used billing name and address (generated automatically if somebody asks for an invoice through our online system – this is for the convenience of our customers so that it's not necessary to type it in every time),
- in case of non-Hungarian citizens: whether they would like to receive newsletters in Hungarian instead of English (this is for the convenience of Hungarians living abroad),
- whether the runner is a member of any target group eligible for a discount on the registration fee (e. g. Spuri Golden Card owners),
- results, permanent bib number and eligibility for awards (this is the result calculated based on the data provided by the runner and the data measured during events) in race series (e. g. Club of Jubilee Runners, Half Marathon Mania).

Additional data:

- whether the runner gives consent to forward his/her results of the ATOM100+ race series to the ATOM100+ organizers,
- whether the runner gives consent to forward his/her results and Ötpróba ID of the Ötpróba (Pentathlon) race series to the Ötpróba organizers, in addition to store and query his/her points scored at Ötpróba in the BSI database. (This data is required to credit the Ötpróba points and to determine the eligibility for discounts based on the points scored at Ötpróba. The consent is required to credit the points and to be eligible for the discounts.) Consent can be given or revoked by providing the Ötpróba ID (starting with 5p).

Special data:

- In case of our customers who are eligible for a discount for the registration fee due to disability we register the disability as the basis for the discount (without further details, e.g. wheelchaired, visually impaired, hearing impaired).
- Results of the participants in wheelchairs and in handbikes are listed separately.

This data is suitable for drawing conclusions on health conditions. Apart from this BSI does not manage and store any other special data.

Additional data recorded about participants who sign up through the online registration system:

- online ID,
- username,
- encrypted password,
- the last date of the password change (it is necessary for the program to operate and for troubleshooting),
- transaction ID upon paying online with card, which is necessary for financial control and for problem solving.

Data regarding the different races:

- the goal time and actual finish time of the race (or the distance traveled, in case of timed races), category, place, part times in certain cases,
- paid registration fee, type of discount, payment method and date,
- bib pick-up, confirmation, date of deferral,
- T-shirt size,
- name of the company (in case the company finances the registration or the participant enters a corporate running event),
- whether it is a student entry (for statistical purposes, and to check the eligibility of the registration),
- the name to be written on the bib (not mandatory, only if the participant requests it and only at certain events),
- whether the participant enters the race/distance for the first time (not mandatory, used for statistical and marketing purposes, and to provide the first-time participants with the special bib),
- whether the participant has entered the National Championships – based on the start list given by the Hungarian Athletics Association (to compile the results list for)
- name and address of a relative in case of emergency (not mandatory, in the interest of the participant and the family),
- other remarks related to the administration (deferring the entry, clarifying payment issues, transferring the entry to another individual, etc.).

School entries

For the preparation to the bundle registration for schools, we operate a separate sign up interface at the https://iskola.futanet.hu website that only the schools applying to the program have access to. The students' data entered here is visible to the staff of BSI and to the organizing teacher.

Registration for individuals under 16

We accept entries to our events and races from individuals under the age of 16. In the age of the internet it would be unrealistic trying to obtain a parent's signature prior to the event, thus upon registration we ask for the parent's e-mail address who then will be notified of the entry of the

individual under 16, this way we grant them the right to object. This e-mail address is deleted after the participant has reached 16 years of age.

If you had your data deleted from our database, you can still sign up for our future events, but your previous entries will not be considered. This way you will not be eligible for the "already participated at a BSI event" type of discounts for the registration fee, for the membership in the Club of Jubilee Runners, for other reduced entry fees, and your results regarding the Half Marathon Mania, "The Company Runs" promotion, and the Spuri Golden Card will not be taken into account. If in the given year you participated at a race that is part of "The Company Runs" promotion, your company may be at a disadvantage when the results are calculated.

Deleting your data

Our customers can ask us any time to delete their personal data from our database under the law. If you have already registered for an event, you have to retrieve from the competition at the same time. You have to unsubscribe to 'Spuri' as well, since we do not know who we should send the magazine to.

Even if the data subject has withdrawn his consent, under Section 6 (5) of the Privacy Act we will be able to store the data where this is necessary for compliance with a legal obligation pertaining to the controller or for the purposes of legitimate interests pursued by the controller or by a third party.

Our legal obligations include complying with audits, for which we need the payment data stored in the database. Our legitimate interest is to save the integrity of the database. That is why for technical reasons (due to the structure of databases) we cannot delete data which is closely linked to other data (eg. external key) It is our legal obligation, and at the same time it is our legitimate interest and obligation to third parties to save the backups so as to be able to restore the database if it has been damaged. Data from the backups cannot be deleted, only from the production server. Only the system administrator can have access to the backups, and we only use them in case of malfunctioning to restore the system. It is our legitimate interest to be able to get statistical data from our database so that the number and statistical composition of entrants will remain the same. It is the legitimate interest of third parties that we should be able to track who registered them for the event concerned. (If you have registered someone, then that person might have problems if we cannot clarify the details of registration). If a team member asks us to have his/her data deleted, we do not want to delete the registration and results of the whole team.

Consequently, we can only delete the data of those customers who have never registered for any of our events, have not subscribed for Spuri Running Magazine, have not bought any products and services from us, that is to say they have only created an account. The data of those people who registered in person, or transferred the registration fee, that is to say there is no important data about them in our online registration system, can be deleted from the online registration system – however, the necessary data will remain in our main database. Apart from that, we delete their name, their address, the name of their club, the name of the person who 'should be contacted in case of an accident', the name of their company if it is given, their last used billing name and address, or any other data recorded which is not necessary to save the integrity of our database.

If you have already had your data deleted, you can register for our events again in the future, but we cannot take into consideration your previous registrations. As a result, you can lose the benefits of

paying a reduced registration fee if 'you have already entered an event organized by BSI', or you will not be entitled to a membership of the Club of Jubilee Runners, or your previous results will not be taken into consideration in Half Marathon Mania, corporate running events, Spuri Golden Card and you will not be eligible for further fee reductions. If your company participated in any of our corporate running events in the given year, it can be disadvantaged when their results are calculated.

Cookies used on the website

This website uses **cookies**. Cookies are small text files that are placed on your computer's hard drive by websites that you visit. Cookies are designed to hold certain information (for example unique page or language settings) that your browser then forwards to us – depending on the lifespan of the cookies – when you visit our website again

Strictly necessary session cookies

These cookies are necessary for the users to be able to navigate our website, use its functionalities, e.g. among others it keeps track of your movement from page to page during the visit. Session cookies are valid only during your current visit, after that these cookies are deleted automatically from the computer when the session ends and when the browser closes.

Without using these cookies, we cannot guarantee you the use of our website.

Name	Description	Expiration Date
PHPSESSID	A cookie to identify the session on the website	When the browser closes.
cookiebar	Registers that the cookies on our website are enabled	12 months

Performance Cookies

We use Google Analytics cookies to get information about how visitors use our website. These cookies are unable to identify you personally (the currently used IP address is being only partially recorded): they collect different information, e.g. the pages our visitor has seen, where the user clicked on the website, the number of pages the user visited, the viewing time of each session, whether there were error messages – we aim to use all this information to develop our website and to improve user experience.

Name	Description	Expiration Date

Clause of BSI Sport Kft.

The data controller reserves the right to modify its privacy policy when it is necessary. It will be done if the scope of our services is increasing, the technical system is changing, or it is required by law. However, it will not mean using your personal data for other purposes other than the intended initial purpose.
